No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 265

NUMBER 1, AUGUST 15, 1988

COMMUNICATION

Kinetic Characterization, Stereoselectivity, and Species Selectivity of the Inhibition of Plant Acetyl-CoA Carboxylase by the Aryloxyphenoxypropionic Acid Grass Herbicides *Alan R. Rendina, Judy M. Felts, Jacqueline D. Beaudoin, Adrienne C. Craig-Kennard, Larry L. Look, Stacie L. Paraskos, and Jeffrey A. Hagenah* 219

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Pyrocystis lunula Bioluminescence: Physicochemical Characterization of the Luciferin Precursor *C. Fresneau and B. Arrio* 22

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Synthesis and Biological Properties of 5,10-Dideaza-5,6,7,8-tetrahydrofolic Acid *Diane H. Boschelli, Stephanie Webber, John M. Whiteley, Arnold L. Oronsky, and S. S. Kerwar* 43

LIPIDS AND PROSTAGLANDINS

Phorbol Ester Stimulation of Sphingomyelin Synthesis in Human Leukemic HL60 Cells *Zoltan Kiss, Eva Deli, and J. F. Kuo* 38

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

The *in Vitro* Phosphorylation of Calmodulin by the Insulin Receptor Tyrosine Kinase *Joseph P. Laurino, Jerry R. Colca, James D. Pearson, Daryll B. DeWald, and Jay M. McDonald* 8

Characterization of Membrane-Bound Electron Transport Enzymes from Castor Bean Glyoxysomes and Endoplasmic Reticulum *Douglas G. Luster, Mark I. Bowditch, Kim M. Eldridge, and Robert P. Donaldson* 50

Expression of Amino Acid Transport Systems in *Xenopus* Oocytes Injected with mRNA of Rat Small Intestine and Kidney *Hitoshi Aoshima, Kazuo Tomita, and Shigenobu Sugio* 73

Effect of Urea on the Partial Reactions and Crystallization Pattern of Sarcoplasmic Reticulum Adenosine Triphosphatase *Inmaculada Jorge-Garcia, Diana J. Bigelow, Giuseppe Inesi, and James B. Wade* 82

The Rate and Capacity of Calcium Uptake by Sarcoplasmic Reticulum in Fast, Slow, and Cardiac Muscle: Effects of Ryanodine and Ruthenium Red *Joseph J. Feher, Nancy H. Manson, and James L. Poland* 171

MEMBRANES, CELL SURFACES, AND RECEPTORS

Phosphatidylserine Vesicle Lysis by Sendai Virus at Low pH Is Not Due to Virus-Vesicle Fusion *Ruby I. MacDonald* 62

Regulation of Hormone Secretion and Cytosolic Ca^{2+} by Extracellular Ca^{2+} in Parathyroid Cells and C-Cells: Role of Voltage-Sensitive Ca^{2+} Channels
Roman Muff, Edward F. Nemeth, Susanne Haller-Brem, and Jan A. Fischer 128
Release of Alkaline Phosphatase from Human Osteosarcoma Cells by Phosphatidylinositol Phospholipase C: Effect of Tunicamycin
Takashi Nakamura, Kumi Nakamura, and Robert A. Stinson 190

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Aminopyrine Metabolism by Multiple Forms of Cytochrome *P*-450 from Rat Liver Microsomes: Simultaneous Quantitation of Four Aminopyrine Metabolites by High-Performance Liquid Chromatography
Susumu Imaoka, Kazuhide Inoue, and Yoshihiko Funae 159
Inhibition of Steroid 5α-Reductase and Its Effects on Testosterone Hydroxylation by Rat Liver Microsomal Cytochrome *P*-450
Andrew J. Sonderfan and Andrew Parkinson 208

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Calcium-Induced Associations of the Caseins: A Thermodynamic Linkage Approach to Precipitation and Resolubilization
Harold M. Farrell, Jr., Thomas F. Kumosinski, Paul Pulaski, and Marvin P. Thompson 146

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Enzymatic Synthesis of Polymethylated Flavonols in *Chrysosplenium americanum.* III. Purification and Kinetic Analysis of S-Adenosyl-L-methionine:3-Methylquercetin 7-O-Methyltransferase
Henry E. Khouri, Vincenzo De Luca, and Ragai K. Ibrahim 1

PROTEIN STRUCTURE AND FUNCTION

A Calcium-Insoluble 6.4 S Protein Derived from Sea Urchin Cortical Granule Exudate
Robin W. Justice, Carl F. Gottschling, Edward J. Carroll, Jr., and Glenn M. Nagel 136
In Vivo Kinetics and DNA-Binding Properties of the *Ah* Receptor in the Golden Syrian Hamster *George Rucci and Thomas A. Gasiewicz* 197

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Purification and Characterization of a Collagenase Inhibitor Produced by Bovine Vascular Smooth Muscle Cells *Y. A. DeClerck* 28
N-Benzoyl-L-tyrosyl-*p*-aminobenzoic Acid Hydrolase: A Metalloendopeptidase of the Human Intestinal Microvillus Membrane Which Degrades Biologically Active Peptides *Erwin E. Sterchi, Hassan Y. Naim, Michael J. Lentze, Hans-Peter Hauri, and Jack A. M. Fransen* 105
Biosynthesis of *N*-Benzoyl-L-tyrosyl-*p*-aminobenzoic Acid Hydrolase: Disulfide-Linked Dimers Are Formed at the Site of Synthesis in the Rough Endoplasmic Reticulum *Erwin E. Sterchi, Hassan Y. Naim, and Michael J. Lentze* 119
Effect of Tunicamycin on Xylanase Secretion in the Yeast *Cryptococcus albidus*
Rolf Morosoli, Pierre Lécher, and Serge Durand 183

REGULATION OF METABOLISM AND OF ENZYME ACTION

Phosphofructokinase Is Responsible for the Fructose 2,6-Bisphosphate Inhibition of Hexokinase in Tissue Extracts *Hermann Niemeyer and Eliana Rabajille* 91

Legionella micdadei Phosphatase Catalyzes the Hydrolysis of Phosphatidylinositol 4,5-Bisphosphate in Human Neutrophils
Asish K. Saha, John N. Dowling, A. William Pasculle, and Robert H. Glew 94

ERRATUM

Volume 263, Number 1, May 15, 1988: James R. Halpert, "Multiplicity of Steroid-Inducible Cytochromes *P*-450 in Rat Liver Microsomes," pp 59–68 226

NUMBER 2, SEPTEMBER 1988

INVITED PAPER

Redistribution of Phosphate Pools and the Regulation of *Escherichia coli* Adenylate Cyclase Activity *Alan Peterkofsky* 227

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Involvement of the ADP/ATP Carrier in Calcium-Induced Perturbations of the Mitochondrial Inner Membrane Permeability: Importance of the Orientation of the Nucleotide Binding Site *Khanh Lê Quôc and Danielle Lê Quôc* 249

Oxidative Cell Injury in the Killing of Cultured Hepatocytes by Allyl Alcohol
Stefania Miccadei, Dai Nakae, Marlene E. Kyle, Donna Gilfor, and John L. Farber 302

Toxic Consequence of the Abrupt Depletion of Glutathione in Cultured Rat Hepatocytes
Stefania Miccadei, Marlene E. Kyle, Donna Gilfor, and John L. Farber 311

The Mechanism of pH-Dependent Hydrogen Peroxide Cytotoxicity *in Vitro*
Eva M. Link 362

Lethal Injury by Diquat Redox Cycling in an Isolated Hepatocyte Model
Janice O. Tsokos-Kuhn 415

Reduction of Exogenous Quinones and 2,6-Dichlorophenol Indophenol in Cytochrome *b*-Deficient Yeast Mitochondria: A Differential Effect on Center *i* and Center *o* of the Cytochrome b-c_1 Complex
Qin-Shi Zhu, Sallie G. Sprague, and Diana S. Beattie 447

Vanadium and Lipid Peroxidation: Evidence for Involvement of Vanadyl and Hydroxyl Radical
Randal J. Keller, Raghubir P. Sharma, Thomas A. Grover, and Lawrence H. Piette 524

The Influence of Heme-Binding Proteins in Heme-Catalyzed Oxidations
Styliani H. Vincent, Robert W. Grady, Nurith Shaklai, John M. Snider, and Ursula Muller-Eberhard 539

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

α-5-Phosphoribosyl-1-pyrophosphate-Independent Salvage of Purines in Cultured Chinese Hamster Lung Fibroblasts *Marcella Camici, Umberto Mura, Francesco Cellini, Antonella Del Corso, Gino Turchi, and Pier Luigi Ipata* 234

Oxidation of Cyanide to the Cyanyl Radical by Peroxidase/H_2O_2 Systems as Determined by Spin Trapping
Silvia N. J. Moreno, Klaus Stolze, Edward G. Janzen, and Ronald P. Mason 267
NADPH Mediates the Inactivation of Bovine Liver Catalase by Monochloroamine
Tadahiko Mashino and Irwin Fridovich 279
Purification and Properties of Sulfhydryl Oxidase from Bovine Pancreas
Debra A. Clare, Inga B. Pinnix, James G. Lecce, and H. Robert Horton 351
Effect of High Levels of Dietary Folic Acid on Folate Metabolism in Vitamin B_{12} Deficiency *E. L. R. Stokstad, A. Reisenauer, G. Kusano, and J. N. Keating* 407
Pathway of Gluconeogenesis from D- and L-Glycerate in Rat Hepatocytes
Kim S. Chen and Henry A. Lardy 433

GLYCOPROTEINS AND GLYCOLIPIDS

Interleukin-1-Induced Alterations in Proteoglycan Metabolism and Matrix Assembly *Srinivasan Chandrasekhar and Kalindi Phadke* 294
Recombinant Human Erythropoietin: Purification and Analysis of Carbohydrate Linkage *Virginia C. Broudy, Jonathan F. Tait, and Jerry S. Powell* 329
Oligosaccharides from Feces of Preterm Infants Fed on Breast Milk
Hemant Sabharwal, Bo Nilsson, Gunnar Grönberg, M. Alan Chester, Jamal Dakour, Sture Sjöblad, and Arne Lundblad 390

LIPIDS AND PROSTAGLANDINS

Acylation of Lysophosphatidylcholine in Bovine Heart Muscle Microsomes: Purification and Kinetic Properties of Acyl-CoA:1-acyl-*sn*-glycero-3-phosphocholine *O*-Acyltransferase
Madhu Sanjanwala, Grace Y. Sun, Michael A. Cutrera, and Ronald A. MacQuarrie 476
Rabbit Reticulocyte Lipoxygenase Catalyzes Specific 12(*S*) and 15(*S*) Oxygenation of Arachidonoyl-phosphatidylcholine *John J. Murray and Alan R. Brash* 514

MEMBRANES, CELL SURFACES, AND RECEPTORS

Identification and Immunohistochemical Localization of a Tryptophan Binding Protein in Nuclear Envelopes of Rat Liver
Rabinder N. Kurl, Ethel Verney, and Herschel Sidransky 286

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

The Binding of Zinc to Angiotensin-Converting Enzyme
John R. Schullek and Irwin B. Wilson 346
Thermodynamic Nonideality as a Probe of Allosteric Mechanisms: Preexistence of the Isomerization Equilibrium for Rabbit Muscle Pyruvate Kinase
Simon J. Harris and Donald J. Winzor 458
Self-Association of Hyaluronate Segments in Aqueous NaCl Solution
Raymond E. Turner, Pinyen Lin, and Mary K. Cowman 484

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Generation and Isolation of Cyanobacterial Inside-out Thylakoid Vesicles
Fredrik Nilsson, David J. Simpson, Alison C. Stewart, and Bertil Andersson 321

Isolation of Sealed Plasma Membrane Vesicles from *Phytophthora megasperma* f. sp. *glycinea*. I. Characterization of Proton Pumping and ATPase Activity
John L. Giannini, Jana S. Holt, and Donald P. Briskin 337
Studies of the Site and Mode of Biosynthesis of Tobacco Trichome Exudate Components
Lili Kandra and George J. Wagner 425
Amino Acid Sequence of a Probable Amylase/Protease Inhibitor from Rice Seeds
Yeon Gyu Yu, Chin Ha Chung, Audree Fowler, and Se Won Suh 466

PROTEIN STRUCTURE AND FUNCTION

The Binding of Heat-Treated Myosin Subfragment 1 to Actin and Substructure Considerations
Pearl Cheung and Emil Reisler 272
Cu(I) Binding to the *Schizosaccharomyces pombe* γ-Glutamyl Peptides Varying in Chain Lengths
Rajesh K. Mehra and Dennis R. Winge 381
The Amino Acid Squence of Bovine Thymus Prothymosin α
C. Panneerselvam, D. Wellner, and B. L. Horecker 454
Phosphatidylglycerol-Modulated Protein Kinase Activity from Human Spleen. I. Enzyme Purification and Properties
Dwight J. Klemm, A. Latif Kazim, and Laurence Elias 496
Phosphatidylglycerol-Modulated Proten Kinase Activity from Human Spleen. II. Interaction with Phospholipid Vesicles
Dwight J. Klemm and Laurence Elias 506
Kinetics of the Formation of Thrombin–Thrombospondin Complexes: Involvement of a 77-kDa Intermediate
Paul C. Browne, Joseph J. Miller, and Thomas C. Detwiler 534

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Effects of Prostaglandin E1 on Collagen Production and Degradation in Human Fetal Lung Fibroblasts
Frank A. Barile, Catherine Ripley-Rouzier, Zafar-E-Alam Siddiqi, and Robert S. Bienkowski 441

REGULATION OF METABOLISM AND OF ENZYME ACTION

Long-Term High-Protein Diet Induces Biochemical and Ultrastructural Changes in Rat Liver Mitochondria
Antonio Jordá, Remedios Zaragozá, Manuel Portolés, Rafael Báguena-Cervellera, and Jaime Renau-Piqueras 241
Characterization of the α-Adrenergic Stimulation of Hepatic Respiration
Consuelo González-Manchón, José-María Saz, Matilde S. Ayuso, and Roberto Parrilla 258
Tyrosine Protein Kinase in Preneoplastic and Neoplastic Rat Liver
Shinri Tamura, Yoichi Suzuki, Kunimi Kikuchi, Ichiro Hatayama, Kiyomi Sato, Reiko Hirai, and Shigeru Tsuiki 373

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Susi, H., and Byler, D. M. (1987) *Arch. Biochem. Biophys.* **258,** 465–469.
2. Bovey, F. A., and Jelinsky, L. W. (1983) Chain Structure and Conformation of Macromolecules, p. 150, Academic Press, New York.
3. Britton, G. (1985) *in* Methods in Enzymology (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
